

Do you need a holiday gift suggestion for someone special in your family? How about purchasing a set of personal headphones or ear buds for them to bring to the computer lab? They need to connect to the computer with a $\frac{1}{4}$ " adapter and ideally would be adjustable across the head. For best results, look for a set that plays in *stereo*. How will you know if it's stereo? You will find 2 lines across the adapter instead of one. This type of headphone can be purchased at stores such as Wal-mart, Target and even the dollar stores. Please do NOT purchase the type that has a microphone attached to it. Personal headphones or ear buds should be brought to school in Zip-lock bags, which have been labeled with your child's name. They will be stored in the classroom. Please consider helping keep your child cleaner and more germ-free by purchasing this practical gift.

The headphones need to have $\frac{1}{4}$ " ends.
NO attached microphones, please!
